## 1. Brief History of the Japanese Tyre Industry

The production scale of the automobile tyre industry of Japan steadily increased from the second half of 1990s to 2008, supported by generally firm demand in the domestic market and active export. It declined severely in 2009 due to the world economic crisis. Though it was recovered to a certain extent in 2010, thereafter it has been gradually decreasing and one of the causes is globalization of the production system.
Number of tyre production in 2018 was 146.75 million (tyres). This is the amount of 1.06 million tons of rubber, which accounts for more than $80 \%$ of the domestic rubber production (newly produced rubber).
Brief history of the tyre industry of Japan in chronological order is as below:
(1) $1940 \mathrm{~s}-1950 \mathrm{~s}$

The industry restructured after World War II, following the destruction of facilities and equipment. In the early 1950s, after the long-term government regulation and during the Korean War, the industry enjoyed special procurement and improved tyre demand. However, after the Korean War, deflationary pressures affected the Japanese economy. Demand for tyres decreased sharply, and the tyre market experienced considerable difficulty.
(2) 1960 s

Around 1960, full-fledged motorization, including increased automobiles on the road and the advent of expressways, spurred the industry toward a technological revolution, including expansion and automation of equipment, as well as changes in the raw materials for tyres, and enjoyed a high-growth phase.
(3) 1970 s

From 1970, the industry suffered demand downturns temporarily as a result of the first oil crisis. However, exports led the growing Japanese economy. Tyre production expanded, as a result of an increase in the number of vehicles produced and registered, and product diversification spurred demand.
(4) 1980 s

Low economic growth under the worldwide recession following the second oil crisis (1979) combined with the progress of radial tyres, which caused demand downturns, forcing the Japanese tyre industry into a period of extreme difficulty. In 1983, however, a turnaround was seen owing to economic recovery in Japan and in principal nations worldwide. In September 1985, however, tyre demand dropped, influenced by the strong yen. Then in December 1986, the Japanese economy started to grow steadily, backed by solid consumer spending and capital investment. As a result, the volume of rubber consumption reached the 1-million-ton mark in 1989.
(5) 1990 s

With the collapse of Japan's "bubble economy," the stock market crashed, corporate profits declined, the job environment became uncertain, consumer spending and capital investment slowed, and the yen appreciated causing further deepening of economic stagnation. Signs of recovery were seen in 1995, but in 1997 Japan entered a recession. In 1998 and 1999, large-scale restructuring in the financial sector and the introduction of foreign capital into the automotive industry arose as serious concerns. On the other hand, the global economy in general remained steady despite economic difficulties in Southeast Asia, supported by the robust U.S. economy. In this environment, the Japanese tyre industry grew overall, although rubber consumption fell below the 1-million-ton mark in 1993. Supported by brisk exports, Japanese tyre production volume increased to 1.13 million tons in 1999, a record high.
(6) 2000 s

The Japanese economy was on a trend of gentle recovering, and although it was still suffering from such problems as continuing high prices of raw materials, it continued the biggest economic growth after the Second World War owing to improved corporate earnings and increased capital investments. Global economy continued strong as a whole until 2007 owing to supports by the robust economy of the United States, Europe, Middle East and BRICs countries, and tyre rubber production volume marked a record high every year from 2002 and it reached 1.36 million tons in 2007.
However, tyre production volume took a downward turn in 2008 after seven years due to the serious worldwide economic crisis from September 2008 and decreased by 360,000 tons, then declined to 990,000 tons under 1 million tons after fifteen years.

## (7) 2010-2018

Although Japanese economy recovered, supported by the government's economic policies etc, it turned in negative growth in 2011 due to the Great East Japan Earthquake and the record appreciation of the yen. After 2013, although there was also the rise of consumption tax in April 2014 and the growth has been weakened temporarily, it has continued its gradually increase by the effect of high stock prices and depreciation of the yen. The world economy was gradually recovering from the after effect of the financial crisis. In addition to the United States where stable growth continues, and Europe that turned into positive growth since the second half of 2013, emerging economies also remained robust in general due to recovery in resource prices and other factors, however, growth slowed in some countries and regions since the middle of the 2018. In this environment of demand, tyre production amount in Japan has increased from the previous year for two consecutive years to 1.06 million tons in rubber consumption in 2018.

## 2. Changes in Production Volume of Tyres and Automobiles

Table 1: Changes in Production Volume of Tyres and Automobiles

|  | 1950 | 1960 | 1970 | 1980 | 1990 | 2000 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tyre Production (for Automobiles) ( $\times 1000$ tons)(quantity of rubber) | 14 | 83 | 369 | 784 | 1,031 | 1,153 | 986 | 1,196 | 1,212 | 1,147 | 1,128 | 1,121 | 1,058 | 1,020 | 1,026 | 1,060 |

Figure 1: Changes in Production Volume of Tyres and Automobiles

## II The Japanese Tyre Industry Today

## 1. Overview

The proportion of tyre production (fig. 2 and 3 ) in the rubber product industry increased by 0.1 points from the previous year to $79.6 \%$ in raw material consumption (the amount of newly produced rubber) and increased by 1.0 point from the previous year to $52.1 \%$ in the sales amount. (Source: Ministry of Economy, Trade and Industry current survey of production)

The proportion of tyre production in the rubber product industry in 2018 (excluding cart tyres, tubes and flaps)

Figure 2: Raw material consumption (the amount of newly produced rubber)

Figure 3: The sales amount

Source: Ministry of Economy, Trade and Industry current survey of production

Figure 4: Trends in the raw material consumption (the amount of newly produced rubber) and the sales amount of the tyre industry of Japan

## 2. Trends in Production by Tyre Category

The production volume of automobile tyres increased by $1.3 \%$ to 146.75 million tyres in 2018 , increased from the previous year for the first time in four years. Due to the increase in export, passenger car tyres increased by $1.4 \%$ from the previous year and light truck tyres increased by $1.8 \%$ from the previous year due to the increase in domestic. Truck \& bus tyres have kept almost the same level as the previous year.

Table 2: Automobile tyre production in 2018

|  | Production |  |
| :--- | :---: | :---: |
|  | Units $\left(\times 10^{3}\right)$ | $2018 / 2017(\%)$ |
| Passenger car tyres | 109,816 | 101.4 |
| Light truck tyres | 21,921 | 101.8 |
| Truck and bus tyres | 10,513 | 100.1 |
| Others | 4,499 | 97.0 |
| Total | 146,749 | 101.3 |
| N.B.: 1. "Others" are off-the-road tyres, industrial tyres, |  |  |
| agricultural tyres, cart tyres, and motorcycle tyres. <br> 2. Figures of some domestic manufacturers that are <br> non-member of JATMA are included. | Source: JATMA |  |

Figure 5: Trends in automobile tyre production

## 3. Trends in Sales of Original Equipment Tyres

The sales volume of original equipment tyres decreased by $0.6 \%$ to 46.23 million tyres in 2018 , slightly decreased from the previous year.
Due to the increase in domestic new car sales, the sales volume of light truck tyres increased by $1.0 \%$ from the previous year, however, passenger car tyres decreased by $0.6 \%$ from the previous year, truck \& bus tyres decreased by $4.2 \%$ from the previous year.

Table 3: Sales of original equipment tyres in 2018

|  | Sales |  |
| :--- | :---: | :---: |
|  | Units $\left(\times 10^{3}\right)$ | $2018 / 2017(\%)$ |
| Passenger car tyres | 37,661 | 99.4 |
| Light truck tyres | 5,340 | 101.0 |
| Truck and bus tyres | 1,334 | 95.8 |
| Special vehicle tyres | 821 | 101.9 |
| Motorcycle tyres | 1,072 | 96.8 |
| Total | 46,228 | 99.4 |
| N.B.: 1. Special vehicle tyres include off-the-road, industrial, |  |  |
| agricultural, and cart tyres. |  |  |
| 2. Figures of some domestic manufacturers that are <br> non-member of JATMA are included. <br> 3. Imported tyres manufactured outside Japan by <br> Japanese manufacturers are included. |  |  |

Figure 6: Trends in sales of original equipment tyres

## 4. Trends in Sales of Replacement Tyres

The sales volume of replacement tyres decreased by $0.4 \%$ from the previous year to 74.31 million tyres in 2018 and has kept almost the same level as the previous year.

Table 4: Sales of replacement tyres in 2018

|  | Sales |  |
| :--- | :---: | :---: |
|  | Units $\left(\times 10^{3}\right)$ | 2018/2017(\%) |
| Passenger car tyres | 52,119 | 99.2 |
| Light truck tyres | 13,985 | 102.0 |
| Truck and bus tyres | 5,506 | 100.9 |
| Special vehicle tyres | 781 | 97.6 |
| Motorcycle tyres | 1,919 | 91.0 |
| Total | 74,310 | 99.6 |
| N.B.: 1. Special vehicle tyres inc/ude off-the-road, industrial, |  |  |
| agricultural, and cart tyres. |  |  |
| 2. Figures of some domestic manufacturers that are |  |  |
| non-member of JATMA are included. |  |  |
| 3. Imported tyres manufactured outside Japan by |  |  |
| Japanese manufacturers are included. |  |  |

Figure 7: Trends in sales of replacement tyres

## Trends in Sales of Summer Tyres and Winter Tyres for Replacement (for Four-Wheeled Vehicles)

The sales volume of summer tyres (normal tyres except snow tyres) decreased by $3.4 \%$ from the previous year to 45.82 million tyres in 2018 and decreased from the previous year for the first time in three years. The sales volume of the all types decreased from the previous year, respectively, passenger car tyres, light truck tyres, and truck \& bus tyres decreased by $4.0 \%$, by $1.5 \%$, and by $2.4 \%$.

Table 5-1:
Sales of summer tyres for replacement (for four-wheeled vehicles) in 2018

|  | Summer tyres |  |  |
| :--- | :---: | :---: | :---: |
|  | Units $\left(\times 10^{3}\right)$ | $2018 / 2017(\%)$ | Summer tyre <br> rate $(\%)$ |
|  | 33,686 | 96.0 | 64.6 |
| Light truck tyres | 9,208 | 98.5 | 65.8 |
| Truck and bus tyres | 2,929 | 97.6 | 53.2 |
| Total | 45,823 | 96.6 | 64.0 |

N.B.: 1. "Summer tyre rate" indicates a percentage of summer Source: JATMA tyres in total number of replacement tyre sales.
2. Imported tyres manufactured outside Japan by Japanese manufacturers are included.
3. All-season tyres are included in this category.

Figure 8-1: Trends in sales of summer tyres for replacement (for four-wheeled vehicles)

The sales volume of winter tyres increased by $6.1 \%$ to 25.79 million tyres in 2018, increased from the previous year for two consecutive years.
Due to the influence of heavy snow in January, the sales volume of the all types increased from the previous year, respectively, passenger car tyres, light truck tyres, and truck \& bus tyres increased by $5.4 \%$, by $9.5 \%$, and by $4.9 \%$.

Table 5-2:
Sales of winter tyres for replacement (for four-wheeled vehicles) in 2018

|  | Winter tyres |  |  |
| :--- | :---: | :---: | :---: |
|  | Units $\left(\times 10^{3}\right)$ | $2018 / 2017(\%)$ | Winter tyre <br> rate(\%) |
| Passenger car tyres | 18,433 | 105.4 | 35.4 |
| Light truck tyres | 4,777 | 109.5 | 34.2 |
| Truck and bus tyres | 2,577 | 104.9 | 46.8 |
| Total | 25,787 | 106.1 | 36.0 |

N.B.: 1. "Winter tyre rate" indicates the percentage of winter tyres in total number of replacement tyre sales.
2. Imported tyres manufactured outside Japan by

Japanese manufacturers are included.

Figure 8-2: Trends in sales of winter tyres for replacement (for four-wheeled vehicles)

## 5. Trends in Sales of Export Tyres

The export volume of automobile tyres increased by $0.1 \%$ to 43.35 million tyres in 2018, has kept almost the same level as the previous year. Passenger car tyres increased by $1.7 \%$ from the previous year. However, light truck tyres and truck \& bus tyres decreased by $5.1 \%$ and by $3.2 \%$ from the previous year.

Table 6: Sales of export tyres in 2018

|  | Sales |  |
| :--- | :---: | :---: |
|  | Units $\left(\times 10^{3}\right)$ | 2018/2017(\%) |
| Passenger car tyres | 31,176 | 101.7 |
| Light truck tyres | 5,589 | 94.9 |
| Truck and bus tyres | 4,057 | 96.8 |
| Others | 2,530 | 98.9 |
| Total | 43,352 | 100.1 |
| N.B.: 1. "Others" are off-the-road tyres, industrial tyres, <br> agricultural tyres, cart tyres, and motorcycle tyres. <br> 2. Figures of some domestic manufacturers that are <br> non-member of JATMA are included. | Source: JATMA |  |

Figure 9: Trends in sales of export tyres

## 6. Exports by Region of Destination

The export volume of automobile tyres in 2018 (on customs clearance basis of Ministry of Finance) decreased by $0.2 \%$ to 44.89 million tyres in quantity basis from the previous year, increased by $3.9 \%$ to 547.3 billion yen amount of money from the previous year, and increased by $2.9 \%$ to 1.11 million tons in product weight basis from the previous year.
By region (in quantity basis), North America and Europe exports increased but other regions exports decreased, and resulted almost same as the previous year in total.

Table 7: Exports by region of destination in 2018

|  | Tyre Units $\left(\times 10^{3}\right)$ |  |  |  |  | $\begin{array}{c}2018 / \\ 2017 \\ (\%)\end{array}$ | $\begin{array}{c}\text { Value } \\ (\text { (FOB }) \\ \left(\text { yen } \times 10^{6}\right)\end{array}$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | \(\left.\begin{array}{c}2018 / <br>

2017 <br>
(\%)\end{array}\right]\)
N.B.: 1. Exchange rates are averages of spot rates for Tokyo interbank trade. 2017: 1 dollar = 112yen 2018: 1dollar = 110yen
2. "Others" doesn't include Aircraft tyres and Bicycle tyres.

Figure 10: Export trend by region

## 7. Imports by Region of Origin

The import volume of automobile tyres in 2018 (on customs clearance basis of Ministry of Finance) increased by $2.3 \%$ to 29.97 million tyres in quantity basis from the previous year, increased by $6.1 \%$ to 129.4 billion yen amount of money from the previous year, and increased by $4.1 \%$ to 0.27 million tons in product weight basis from the previous year.
By region (in quantity basis), imports from Asia which account for about $90 \%$ of the total increased and resulted in increase from the previous year in total.

Table 8: Imports by region of origin in 2018

|  | Tyre Units( $\times 10^{3}$ ) |  |  |  | $\begin{gathered} \hline 2018 / \\ 2017 \\ (\%) \\ \hline \end{gathered}$ |  | $\begin{gathered} 2018 / \\ 2017 \\ (\%) \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | PC | TB\&LT | Others | Total |  |  |  |

[^0]Figure 11: Import trends by region

## 1. Safety Standards for Automobile Tyres

Various standards have been specified regarding tyres from the viewpoint of automobile safety because tyres are automobile's important parts.
Each Individual state has its own legislation specifying the standards and the tyres are requested to satisfy the standards of the state where the tyres are to be used. In Japan we have the Safety Regulations for Road Vehicles and their detailed items, enacted by the Ministry of Land, Infrastructure, Transport and Tourism.
In addition to these regulations, the guidelines for the items to be complied in usage and maintenance of automobile tyres are specified in "Standards for Selection, Usage and Maintenance of Automobile Tyres" by JATMA to ensure and enlighten the tyre safety.

## 2. Tyre Standards

Besides the safety standards, standards for specifications of automobile tyres, rims and valves are set by the Tyre Standards Committee which comprises representatives from tyre manufacturers and vehicle manufacturers, and government ministries concerned and published in book form as JATMA YEAR BOOK annually by JATMA. JATMA YEAR BOOK is designed to promote standardization, simplification, and unification of tyre use within Japan, and is contributing to rationalization of production and use of fair tyres while ensuring the interchangeability.
The JATMA standards are quoted in the Federal Motor Vehicle Safety Standards and Regulations of U.S., applied to tyres exporting to Canada, Australia and so on; and recognized as one of authoritative guidelines such as the ETRTO standards of Europe and TRA standards of US.
The JATMA standards cover the following tyre categories:

- passenger car tyres,
- light truck tyres,
- truck and bus tyres,
- off-road vehicle tyres,
- agricultural equipment tyres,
- industrial vehicle tyres, and
- motorcycle tyres.

## 3. Legal Limits on Tread Wear

Worn tyres could be a threat to road safety. They're easier to slip especially on wet roads because of the degradation of their braking performance, comparing to new tyres. Thus the Ministry of Land, Infrastructure, Transport and Tourism prescribed requirements for tyre groove depth (minimum groove depth) in its Safety Regulations for Road Vehicles, and proscribed the use of tyres of insufficient groove depth on roads. (see table 9 and 10 (table 10 for high-speed driving)). Shown in figure 12 is the result of actual inspection on in-service vehicles conducted by JATMA. As it is shown, the number of improper inflation pressure tyres, uneven wear tyres, and insufficient groove depth tyres are notably high.

## 4. Product Inspection

In 1954, JATMA started its tyre inspection activity at its branch offices.
Defective or damaged tyres are now observed and checked at six offices according to the requests from their consumers to find causes of the damages and to provide advice to them regarding correct usage of tyres.

Table 9: Wear limit for automobile tyres

| Tyre type | Groove depth limit |
| :--- | :---: |
| Passenger car tyres | 1.6 mm |
| Light truck tyres | 1.6 mm |
| Truck and bus tyres | 1.6 mm |
| Motorcycle tyres | 0.8 mm |

Table 10: Wear limit for automobile tyres in high-speed driving

| Tyre type | Groove depth limit |
| :--- | :---: |
| Passenger car tyres | 1.6 mm |
| Light truck tyres | 2.4 mm |
| Truck and bus tyres | 3.2 mm |

Figure 12: Breakdown of tyre defects
(Parentheses show defect rates)

## Notes:

1. Multiple tyre defects per vehicle are possible, thus the number of tyre defects does not correspond to the number of vehicles with tyre defects.
2. The defect rate is the number of defects divided by the number of vehicles inspected.
3. Tyre inspections were carried out a total of 35 times (13 times on expressways and 22 times on ordinary roads) in 2018.

## 1. Tyre Labeling System

The need for further improvement of energy efficiency in the transport field is globally discussed as IEA (International Energy Agency) made a proposal at G8 Summit. In the circumstances, the Japanese government established "the FuelEfficient Tyre Promotion Council" in order to study promotion of fuel-efficient tyres etc. JATMA took part in it and the discussions focused on concrete measures had been made over and over from January 2009. And eventually, in January 2010, JATMA launched their voluntary standard "Tyre Labeling System" by displaying performance levels of fuel efficient tyres on the labels plainly for consumers, for the purpose of further promotion of fuel efficient tyres.

## Principal contents of the system

- Scope : Summer tyres for passenger car that are purchased as replacement tyres by consumers at tyre dealers etc.
- Grading System :

Rolling Resistance Coefficient (RRC)
.................A range of five grades (Grade AAA to C)
Wet Grip Performance
.....................A range of four grades (Grade a to d)

| Unit (N/kN) |  |
| :---: | :---: |
| RRC | Grade |
| $\mathrm{RRC} \leqq 6.5$ | AAA |
| $6.6 \leqq \mathrm{RRC} \leqq 7.7$ | AA |
| $7.8 \leqq R R C \leqq 9.0$ | A |
| $9.1 \leqq$ RRC $\leqq 10.5$ | B |
| $10.6 \leqq$ RRC $\leqq 12.0$ | C |
| Unit (\%) |  |
| Wet Grip Performance (G) | Grade |
| $155 \leqq$ G | a |
| $140 \leqq \mathrm{G} \leqq 154$ | b |
| $125 \leqq G \leqq 139$ | c |
| $110 \leqq \mathrm{G} \leqq 124$ | d |

- Performance requirements for fuel efficient tyres :

Rolling Resistance Coefficient
.9 .0 and below (Grade AAA to A)

## Wet Grip Performance

110 and above (Grade a to d)

- Labeling method (Display)
(Fuel efficient tyre)

(Non fuel efficient tyre)

: Uniform mark of fuel efficient tyres

- The spread of fuel efficient tyres :

Fuel efficient tyres are on the increase year by year, and most tyres sold at tyre dealers etc. are fuel efficient tyres now.

## 2. Approach to Reduce $\mathrm{CO}_{2}$ Emissions

In the lifecycle of a tyre (raw material procurement, manufacturing, distribution, usage, recycling and disposal), over $80 \%$ of $\mathrm{CO}_{2}$ emissions occur in the usage stage. By decreasing rolling resistance of tyres, fuel efficiency is improved and lead to the reduction of $\mathrm{CO}_{2}$ emissions of automobile.
According to the results of investigating $\mathrm{CO}_{2}$ emissions in the usage stage for all passenger car tyres (including both original equipment and replacement tyres, available as summer and winter tyres) sold domestically by JATMA members in 2016, total amount of the reduction in $\mathrm{CO}_{2}$ emission compared with 2006 was 2,972,000 tons, 34.1 kg ( $13.9 \%$ ) per tyre.
*Above calculations are made according to "Tyre $\mathrm{LCCO}_{2}$ calculation guidelines Ver. 2.0"

Figure 13: $\mathrm{CO}_{2}$ emission amount during tyre usage stage (per tyre)

Figure 14: Reduction in $\mathrm{CO}_{2}$ emission amount during tyre usage stage

(A): $\mathrm{CO}_{2}$ emission amount of tyres sold in 2006 ( $245.8 \mathrm{~kg} /$ tyre $) \times$ number of tyres sold in 2006
(B) : $\mathrm{CO}_{2}$ emission amount of tyres sold in 2006 ( $245.8 \mathrm{~kg} / \mathrm{tyre}$ ) $\times$ number of tyres sold in 2012
(C): $\mathrm{CO}_{2}$ emission amount of tyres sold in $2012(227.3 \mathrm{~kg} / \mathrm{tyre}) \times$ number of tyres sold in 2012
(D) : $\mathrm{CO}_{2}$ emission amount of tyres sold in $2006(245.8 \mathrm{~kg} / \mathrm{tyre}) \times$ number of tyres sold in 2016
(E): $\mathrm{CO}_{2}$ emission amount of tyres sold in $2016(211.7 \mathrm{~kg} / \mathrm{tyre}) \times$ number of tyres sold in 2016

## 3. Effort to "Reduce"

A new concept, "Reduce Index (Re Index)" which focusing on longer wear life and weight saving has been adopted. Taking this concept as the benchmark on tyre product design and development, endeavor to reduction of scrap tyres generation (target $10 \%$, actual reduction of $3-5 \%$ is expected) by promoting monitoring of the Re achievement rate.

Table 11: Monitoring of Re Achievement Rates

| Category | Monitored Size | Classification | Re Achievement Rate |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 2014 | 2015 | 2016 | 2017 | 2018 |
| Passenger car tyres | 155/65R13 | Summer tyres | 113 | 120 | 111 | 114 | - |
|  |  | Studless tyres | 93 | 97 | 100 | 111 | 102 |
| Passenger car tyres | 175/65R14 | Summer tyres | 110 | 104 | 105 | 113 | 95 |
|  |  | Studless tyres | 93 | 97 | 103 | 111 | 103 |
| Passenger car tyres | 195/65R15 | Summer tyres | 119 | 108 | 126 | 107 | 102 |
|  |  | Studless tyres | 93 | 96 | 103 | 111 | 99 |
| Passenger car tyres | 215/45R17 | Summer tyres | 113 | 101 | 123 | 107 | 101 |
|  |  | Studless tyres | 93 | 97 | 102 | 111 | 97 |
| Light truck tyres | $\begin{gathered} \text { 145R12 } \\ (145 / 80 R 12) \end{gathered}$ | Summer tyres | 96 | - | - | 126 | - |
|  |  | Studless tyres | 152 | 105 | - | - | - |
| Light truck tyres | $\begin{gathered} \text { 185R14 } \\ (185 / 80 R 14) \end{gathered}$ | Summer tyres | - | - | - | - | - |
|  |  | Studless tyres | 148 | 104 | - | - | - |
| Light truck tyres | 205/70R16 | Summer tyres | 119 | - | 125 | - | - |
|  |  | Studless tyres | 111 | 105 | - | - | - |
| Truck and bus tyres | 225/80R17.5 | Summer tyres | - | 100 | 100 | 126 | 118 |
|  |  | Studless tyres | - | - | - | 106 | 87 |
| Truck and bus tyres | 245/70R19.5 | Summer tyres | 104 | 100 | 100 | 122 | 117 |
|  |  | Studless tyres | - | - | - | 100 | 93 |
| Truck and bus tyres | 11R22.5 | Summer tyres | - | 100 | 96 | 119 | 118 |
|  |  | Studless tyres | - | - | - | 100 | 87 |

N.B.: 1. Re Index $=$ Wear Life Index $(L) \div$ Weight Index $(W)$

Re Achievement Rate $=$ Re Index $\times 100$
where Wear Life Index $(L)=[$ Wear life on design specification of new product $(\mathrm{km}) \div$ Wear life on design specification of old product $(\mathrm{km})] \times 100$
Weight Index $(W)=[$ Weight of new product $(\mathrm{kg}) \div$ Weight of old product $(\mathrm{kg})] \times 100$
2. Tyres monitored : Representative 10 sizes selected in advance from replacement tyres for the domestic market.
3. 245/70R19.5 (Truck and Bus tyres) is adopted for monitoring as the replacement of 7.50R16 (Light Truck tyres) from 2007.

## 4. Current Status on Scrap Tyre (Used Tyre) Recycling

Figure 15: Processing flow of scrap tyre recycling

## (1) Volume of scrap tyres generated

The sum of scrap tyres (used tyres) generated at the time of "tyre replacement" and "vehicle scrapping" in 2018 (January to December) was 96 million tyres in quantity, 1,032,000 tons in weight, decreased by 1 million tyres from the previous year, decreased by 2,000 tons in weight from the previous year.
(1) At "tyre replacement"

The volume of newly scrapped tyres at "tyre replacement" was 82 million tyres in quantity, and 892,000 tons in weight, both the unit and the weight decreased compared with the previous year.
This is the effect of decrease in the number of sales of commercial tyres overall.
(2) At "vehicle scrapping"

The volume of newly scrapped tyres at "vehicle scrapping" was 14 million tyres in quantity and 140,000 tons in weight, and the quantity was flat compared with the previous year, and the weight increased slightly.

## (2) Current status of the recycling

The total recycled volume increased by 32,000 tons from the previous year to 997,000 tons in 2018, and the recycling rate was $97 \%$, increased by 4 points.

## (3) Others

The recycling status provided here is for grasping the status of disposal of scrap tyres generated in Japan, so although it is not included in the tabulation, in recent years, domestic heat users continue to purchase cut / shredded tyres from foreign countries.
The importing volume of 2018 was 90,000 tons increased 2,000 tons from the previous year, which indicates the high demand for scrap tyres as alternative fuels.
However, the price at which domestic heat users purchase cut / shredded tyres as alternative fuels has fallen significantly compared with several years ago due to competition with other waste-derived fuels.

## 5. Situation in Illegal Dumping of Scrap Tyres

As of February 2019 the number of cases of illegal dumping of scrap tyres was 75, and the total weight of scrap tyres was 27,677 tons. Comparing to the statistical research of February last year, the number of cases decreased by 14 and the total weight decreased by 8,094 tons.
One new case has been confirmed as new information, but this is not a new occurrence.

## 6. Support Program for Dumping Site Restoration by JATMA

The tyre industry established the support program for dumping site restoration in 2005 and has been operating it in order to reduce illegal dumping of scrap tyres.
In the total of fourteen years, from 2005 to 2018, for 22 cases, JATMA supported 362.13 million yen and removed 2,966,306 units/29,867 tons of scrap tyres.
In 2019, this support is continued.
Note: Please refer to the following Uniform Resource Locator for details.

## 1. Automobiles and Tyres

(1)The number of registered automobiles as of the end of December 2018 increased by $0.3 \%$ from the previous year to 77.94 million. The sales volume of replacement tyres (for four-wheeled vehicles) is 71.61 million, which decreased by $0.2 \%$ from the previous year.

Table 14: Automobile registrations and sales of replacement tyres in 2018

| Automobile | Registrations $\left(\times 10^{3}\right)$ | $2018 / 2017(\%)$ |
| :--- | :---: | :---: |
| Passenger cars | 62,026 | 100.4 |
| Trucks and buses | 15,915 | 99.9 |

Figure 17: Trends in automobile registrations and sales of replacement tyres

(2)The volume of domestic production of automobile increased by $0.4 \%$ from the previous year to 9.73 million.

The sales volume of original equipment tyres (for four-wheeled vehicles) decreased by $0.6 \%$ from the previous year to 44.34 million tyres in 2018.

Table 15: Automobile production and sales of original equipment tyres in 2018

| Automobile | Productions $\left(\times 10^{3}\right)$ | $2018 / 2017(\%)$ |

| Total | 9,730 | 100.4 |
| Original equipment tyres | Sales $\left(\times 10^{3}\right)$ | $2018 / 2017(\%)$ |
| Passenger car tyres | 37,661 | 99.4 |
| Commercial vehicle tyres | 6,674 | 99.9 |
| Total | 44,335 | 99.4 |

Source: Japan Automobile Manufacturers Association, JATMA

Figure 18: Trends in automobile production and sales of original equipment tyres

## 2. Distribution Channels

The distribution of automobile tyres is divided into three channels: original equipment, replacement and exports. The channel for replacement is particularly wide-ranging with distributors as key stations as shown in Figure 19. The routes for the channels are roughly divided into two types: direct sales and indirect sales. Direct sales are those under which distributors sell tyres directly to some large users, such as transport, bus and taxi companies, and government and municipal users. Indirect sales are those under which tyre dealers supply tyres to end users. About 90 distributors and approximately about 110,000 tyre dealers supply replacement tyres. In addition, the component ratio (quantity) of sales for each channel in 2018 is $28.2 \%$ for original equipment, $45.3 \%$ for replacements and $26.5 \%$ for exports.

Figure 19: Distribution channels

Figure 20: Trends in sales share of automobile tyres

## 3. Raw Materials

More than 100 raw materials are used in the production of automobile tyres, including rubber, reinforcing agent, tyre cord, compounding ingredients and bead wire.
The percent distribution in weight of raw materials varied depending on the tyre category, it used in tyres was approximately the same as the previous year, rubber constituting about half of a tyre (natural rubber 30\% and synthetic rubber $21 \%$ ), next comes reinforcing agent (carbon black) $25 \%$, and then tyre cord $14 \%$.

Table 16: Basic composition

| Composition | Examples |
| :--- | :--- |
| Rubber | Natural rubber, Synthetic rubber |
| Reinforcing agent | Carbon black, Silica |
| Tyre cord | Steel cord, Textile cord <br> (Nylon, Polyester, Rayon, etc.) |
| Compounding | Vulcanizing agent, <br> Vulcanizing accelerator, <br> Vulcanizing accelerator aid, <br> ingredients |
| Antioxidant, Filler, Softener etc. |  |

Table 17: Consumption of main raw materials used in automobile tyres in 2018

| Raw Materials |  | Consumption (tons) | 2018/2017(\%) |
| :--- | :--- | ---: | :---: |
| Rubber | Natural rubber | 621,200 | 104.4 |
|  | Synthetic rubber | 424,920 | 101.8 |
|  | Total | $1,046,120$ | 103.3 |
| Reinforcing agent (Carbon black) | 492,329 | 103.2 |  |

|  |  | Nylon | 15,460 |
|  |  | 41,991 | 99.5 |
|  | Rayon | 3,178 | 101.7 |
|  | Others | 384 | 85.1 |

Figure 21: Tyre raw material weight composition

## 4. Tyre Production Worldwide

According to IRSG (International Rubber Study Group) research, it is estimated that the total production of tyres of the world in 2018 was 17.14 million tons, increased by $3 \%$ from the previous year.
By region it is estimated that the Asia and Oceania region takes up $67 \%$ of the world production, in which China accounts for $40 \%$ and Japan accounts for $6 \%$.
